CANNING-GILLESPIE

A very pretty wedding was solemnized in the Carbon United Church on Wednesday, February 20th at 4 p.m. when Eunice Marie Gillespie and Sidney Thomas Canning were united in marriage. Rev. Mr. Galbraith officiated.

The bride entered the church on the arm of her father to the strains of the wedding march played by Mrs. Stan. Torrance.

She wore a light brown suit with yellow corsage and green accessories. Her attendant, Miss Maxine Ziegler wore a brown suit with pink corsage and accessories.

The groom was attended by his brother, Edwin, and Glen Cannings was usher.

During the signing of the register, Mr. Donald Gordon sang "Because."

The reception was held at the home of the bride's parents. The young couple left later for a motor trip, returning home Saturday.

Mr. Len Poxon is a Calgary visitor this week.

Mr. and Mrs. Cliff Kline and sons were Sunday visitors at the home of Mrs. Bertsch.

The Mixed Bonspiel is well underway. The Anglican W.A. is in charge of refreshments.

Mr. Vance, manager of the Carbon Hotel has been called to Vermilion owing to the death of his wife on Monday of this week.

Mr. and Mrs. Sid Cannings, Jr have left to make their home in Munson where Sid has accepted a position with the Pioneer Elevator.

The John Deere Day held Monday the 25th was very well attended. The door prize of a box of chocolates was won by Mrs. P. Larson.

The Blue Ribbon Event of the Bonspiel has been completed as follows:

1. J. Barber, Carbon.
2. Norman Nash, Carbon.
3. Ferguson, Ghost Pine.
4. Jack Barr, Ghost Pine.

Don't forget the Home Cooking Sale March 1st.

Lions Ice Carnival has been called off till March 7th. Watch Posters.

Mr. W.B. McCracken is a patient in a Calgary hospital undergoing an operation.

Mr. W. Schacher was a Calgary visitor Monday attending a Cockshutt Service School.

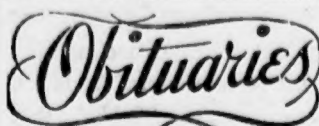

Mr. Leo Gillespie was called to Edmonton Saturday owing to the illness of his mother.

Mr. Laverne Gillespie of Edmonton was home for a few days to attend the wedding of his sister, Eunice.

We notice the Hotel Cafe is being remodelled and redecorated. The Cafe will open under new management on Feb. 27.

Cards of Thanks

Mr. T. King wishes to thank his friends and very kind neighbors for the help and kindness shown to him in his recent sad bereavement.

MRS. FLORENCE GARRETT

We regret to report the death of Mrs. Florence Garrett, who passed away Sunday in Drumheller hospital at the age of 95. Mrs. Garrett had resided in the Carbon district for 47 years.

She is survived by five sons, Samuel, John and Richard of Carbon; William Wood of Calgary and Stephen Wood of Coventry, England; two daughters, Mrs. Sarah Butter in England and Mrs. William Elliott of Irri-cana.

Rev. G.B. Hotchkis conducted funeral services in Christ Church, Carbon on Wednesday at 2 p.m.

ATTENTION FARMERS

Why take chances with poisonous dusts when treating your grain? Treat with Panogen, the modern liquid seed disinfectant. Approved by the Dept. of Agriculture and Dominion Lab after three years of testing in Canada and U.S.A.

Panogen is distributed by United Engine and Threshers and has never been distributed by any other firm in Alberta.

Panogen is recommended for the control of the following diseases:

WHEAT—Stinking smut, seed decay and seed borne seedling blight.

OATS—Seed decay, scab seedling blight, damping-off, loose and covered smuts and seed borne Helminthosporium blight.

BARLEY—Covered or black loose smut, stripe disease and seed borne scab seedling blight.

RYE & FLAX, ETC.

Make arrangements to have your grain cleaned and treated now at the Alberta Pacific Grain at Acme. We will be glad to supply any further information.

JOHN GOULDIE, AGENT.

FOR SALE—No. 27 Massey-Harris Self-Propelled Combine. Only run a few days. Good Discount. 6 ft. International Tiller, reconditioned, 2 wheels on rubber. Ford-Ferguson Tractor, A1 shape with step up transmission. Ford V-8 Truck Motor, complete with transmission and radiator suitable for power unit. Cyclone Dust Collector, good as new. AC 115-120 volt, 350 watt Portable Light Plant. Linden Machine Works; phone 2120, Acme; Linden, Alta.

FOR SALE—No. 1 Couch Free Brome Seed. 19c a lb., bags included. 5 pct. discount on 1000 lb. lots. Prices on other grass seeds on request. Sold at Linden Machine Works. Phone 2120, Acme, Linden, Alta.

LOW Winter Excursion FARES to the PACIFIC COAST!

On Sale to March 31

Special low winter rates to Vancouver and New Westminster are in effect now from all Canadian Pacific stations in Saskatchewan and Alberta.

21 DAY RETURN LIMIT

Longer return limit available at slightly higher fares.

Enjoy a winter vacation in Canada's mildest climate... take advantage of these low excursion fares to the Pacific coast. There's air-conditioned accommodation to fit every purse—from coaches and sleepers to roomettes and drawing rooms.

Plan your winter vacation now! Your Canadian Pacific agent will give you full information.

Canadian Pacific

Put away your Overshoes, but don't shed your CAUTION!

If the weather pattern runs true to form we can count on another 6 to 8 weeks of hazardous highway conditions. Sudden sleet storms, snow and frozen rain slicks will add to the danger.

Don't let a few days of relatively pleasant and safe driving conditions lure you into dropping the caution you used all winter.

Be Careful - the life you save may be your own!

High Farm Income

RECENT REPORTS on the cash income of farmers in the past year show that returns from the sale of farm products was the highest on record. Like all other Canadians, farmers have faced higher living costs and higher production costs in recent years, and much of the increased income is absorbed in these. It is, however, encouraging for farmers to receive prices for their products in keeping with the price levels of other commodities. The cash income for farmers in 1951 totalled \$2,819,400,000 according to the report of the Dominion Bureau of Statistics, and this figure was twenty-eight per cent. higher than the earnings for 1950, which were \$2,223,000,000.

Reasons For Higher Figure

Higher prices for livestock was one of the factors contributing to the increased cash income. Payments by the Canadian Wheat Board and the fact that much of the previous year's grain crop was marketed in the spring also contributed to the rise in income. In addition, some Prairie farmers shared in payments of \$10,400,000 made by the federal government under the Prairie Farms Assistance Act, in cases where drought and other hazards had impaired the crops. Saskatchewan farmers were second among those of all the provinces in the amount of cash income received. Ontario came first with \$793,192,000, while Saskatchewan followed with \$622,002,000.

Most Wheat For Export

Alberta was in third place among the provinces, cash income for farm products there being \$467,380,000. Quebec, Manitoba and British Columbia were next, followed by the Maritime provinces. In all cases there were substantial gains over the figures for the previous year. At the beginning of the 1952 crop year, prospects are again good for continued high returns for farm products. In January, 1952, Canada was reported to have more wheat for export than any other country and at the same time, world demand was strong, and expected to remain so. Prospects for sustained prices for most other farm products also appear favourable at this time, and there is reason to hope that cash income levels for Canadian farmers will continue to be high throughout the coming year.

: Western Briefs :

Gloom In Vancouver

VANCOUVER.—January was the gloomiest month in Vancouver's recorded history, the weatherman reported. The sun shone only 8.9 hours in the entire 31 days, an all-time record. Average sunshine for January is 47.2 hours.

Build Walk-Through Tunnel

REGINA.—Winter comfort is assured at the Royal Canadian Mounted Police training barracks here. A walk-through tunnel, 2,600 feet long, has been completed to connect the various buildings.

"Where Are the Indians?"

VANCOUVER.—The Vancouver Tourist Association faithfully noted down suggestions and complaints by American visitors for study at its annual meeting. "City far too smoky" headed the list. Other visitors wanted to know "Where are the Indians?"

More Telephones

FOAM LAKE, Sask.—In a report to the Foam Lake board of trade at its regular meeting held recently, A.

Evans, telephone exchange operator here reported that an additional 60 telephone lines had been added to the system over the past six years. The board discussed the possibilities of publishing a local business directory.

Ten Weeks of Racing

VANCOUVER.—Vancouver will have 10 weeks of horse racing this summer. The dates were announced with the opening at Lansdowne track June 14 and at Exhibition Park, Aug. 2. The Lansdowne meet will end July 31 and Exhibition Park, Sept. 15.

To Seek Less Work Hours

VANCOUVER.—British Columbia's biggest union decided to try for a 32-hour week in 1952 contracts with the same take-home pay as for the current 40 hours. Basic wage now is \$1.29½ an hour. The B.C. district of the International Woodworkers of America (C.I.O.-C.C.S.) also reaffirmed support for the C.C.F. party.

Herds Afflicted

RAYMOND, Alta.—Reports are coming in from both feed yards and range cattle of cases of coccidiosis in the herds and losses from the disease. The extent or loss is not known at this time.

Kitchen Meditations

By JANE DALE

THE PULLETS ARE LAYING!

The pullets are laying—now what do you think!
I found a warm egg when I took them a drink.
They've been singing for days—though it's forty below,
And the henhouse fair hidden by four feet of snow.
Their combs are as rosy as petunias in June,
But I didn't dare hope they'd be laying so soon.
I'll make a custard—all creamy and nice,
And a cake—it's our favorite—topped with sugar 'n' spice;
There'll be scrambled eggs, or poached ones on toast;
Or fried ones for supper to spell off the roast.
There are so many ways to use them, I know
Now the pullets are laying—though it's forty below!

Think Right—Eat Right—Live Right

PEGGY

"HAVING MORNING BATHROOM-TRAFFIC TROUBLES, FRIEND? LISTEN TO HOW I LIKED THE PROBLEM OF MY DAUGHTER PEGGY'S MONOPOLY..."

INSTALLATION OF WASH-BOWLS IN OUR BEDROOMS BEING TOO EXPENSIVE, I HIT UPON AN OLD-FASHIONED BUT INGENIOUS IDEA...

TO LEAD SCOUTS TO JAMBOREE—In charge of two troops of Canadian Boy Scouts attending the First Caribbean Jamboree at Jamaica in March is John A. Snow of Willowdale, Ont. The troops are selected from scout groups across Canada.

Funny and Otherwise

"My wife always lets me have the last word!" exulted the husband of two months.
"Huh!" snorted a seasoned old-timer; "just wait until you run out of compliments, young feller!"

"Wilson," said the teacher, "when was Magna Carta signed?"
"At a quarter past twelve, sir."

"At a quarter past twelve?"
"Yes, sir—1215!"

A person brings nothing into this world and takes nothing out of it. And considering the kind of world it is, he's extremely lucky to break even.

A little girl, aged seven, was asked to explain the difference between pride and vanity. After a little thought she answered, "Pride means 'I don't think much of you' and vanity means 'What do you think of me?'"

The butcher was weighing up a roast recently when his customer observed: "Say, you're giving me a lot of bone there, aren't you?"
"Oh, no, I'm not," answered the butcher. "You're paying 99 cents a pound for it."

"How's this?" asked the lawyer. "You've named six bankers in your will to be pallbearers. Of course, it's all right, but wouldn't you rather choose some friends with whom you are on better terms?"

"No. Those fellows have carried me so long that they might as well finish the job."

Two dairies were engaged in an advertising war. One of the companies engaged a daredevil racer to drive a car round the town with large placards reading: "This Daredevil Drinks Our Milk."

The rival company came out with placards, twice as large, reading: "You don't have to be a Daredevil to Drink Our Milk."

Two housewives, while waiting their turn at the grocer's, were overheard discussing the last depression.

"It came at such a bad time," said one, "just when everybody was out of work." 2972

I Was Nearly Crazy With Fiery Itch—

Until I discovered Dr. D. D. Prescription. World famous, this pure, cooling, liquid medication speeds peace and comfort from cruel itching caused by eczema, pimples, rashes, athlete's foot and other itchy troubles. Trial bottle, 43¢. First application checks even the most intense itch or money back. Ask druggist for Dr. D. D. Prescription (ordinary or extra strength).

To Seek Exemption From Taxes On Some Farm Equipment

WINNIPEG.—A petition seeking exemption of some farm equipment from taxes and duty will be forwarded to Ottawa by the Canadian Federation of Farm Equipment Dealers.

Mel Cunningham of Red Deer, Alta., president, announced the move on conclusion of the group's annual convention here. He said exemption will be sought on "certain farm equipment, accessories and attachments on which the Canadian farmer pays unnecessary taxes and duty."

He said the cost of doing business is out of all proportion to the volume of sales. A recent survey showed that dealers' net operating profits were less than 4.4 per cent.

Increased freight rates and rising costs of doing business would undoubtedly reduce profits below that figure.

FIRST BIBLE EVER PLACED BY GIDEONS

LONDON, Ont.—Victoria Hospital, which 30 years ago received the first Bible ever placed in an institution for the sick by the Gideons, was presented recently with the millionth copy of the Scriptures to be distributed by that organization in Canada.

ASK EXEMPTION FROM JAYWALKING CLAUSE

CALGARY.—Calgary's policemen and milkmen want to be exempted from the jaywalking clause in the city's new traffic bylaw.

City Council heard letters saying there was no provision for the milkman to cross the street from his wagon to serve customers.

The Police Department said policemen cannot follow a jaywalker to catch him or they break the law themselves.

Louis Pasteur, celebrated French chemist and bacteriologist, gave his name to a process for purifying milk.

TRADE MARK REG. IN CANADA

Bake this tasty CHEESEBREAD easily, speedily with new Fast DRY Yeast!

● New bread and bun treats are a treat to make with the new form of Fleischmann's Yeast! Never a worry about yeast cakes that stale and lose strength... new Fleischmann's Dry Yeast keeps full strength and fast-acting right in your cupboard. Get a month's supply.

CHEESEBREAD

● Scald 3 c. milk, ¼ c. granulated sugar, 1½ tbs. salt and 4 tbs. shortening; cool to lukewarm. Meanwhile, measure into a large bowl ½ c. lukewarm water, 1 tsp. granulated sugar; stir until sugar is dissolved. Sprinkle with 1 envelope Fleischmann's Fast Rising Dry Yeast. Let stand 10 mins., THEN stir well.

Stir in cooled milk mixture. Stir in 4 c. once-sifted bread flour; beat with a rotary beater until the batter is smooth. Cover and set in a warm place, free from draught. Let rise until doubled in bulk. Work in 2 c. lightly-packed finely-shredded old cheese and 5 c. (about) once-

sifted bread flour. Knead on lightly-floured board until smooth and elastic. Place in greased bowl and grease top of dough. Cover and let rise until doubled in bulk. Punch down dough; turn out on lightly-floured board and divide into 4 equal portions. Cover lightly with a cloth and let rest for 15 mins. Divide each portion of dough into 3 parts; knead and shape into smooth balls. Place 3 balls in each of 4 greased loaf pans (4½" x 8½"). Grease tops and sprinkle each loaf with ¼ c. shredded cheese. Cover and let rise until doubled in bulk. Bake in moderately hot oven, 375°, 45-50 mins.

Salvagers Raise Napoleon's Ships To Build Today's Machines of War

There were tons of iron and brass in the tiers of cannon mounted on the 18th century men-of-war, as shown by this model of Nelson's Victory. Salvaged from scenes of battle in Napoleon's time, the iron is again being cast for war.—Central Press Canadian Photos.

Central Press Canadian
Correspondent

ALEXANDRIA, Egypt. — Salvage work is well under way on the French fleet which was sunk in the Battle of Abukir bay. That battle, though it is now all but forgotten, was a decisive one for the world. For it ended Napoleon's dream of reaching India and establishing a dictatorship over most of the earth.

Napoleon's hope was to conquer Egypt and march eastward to India. The French fleet had come to nearby Abukir bay to protect Napoleon's

LORD NELSON

—Central Press Canadian.

army in Egypt, but the great British seaman Horatio Nelson sunk the French ships in a daring exploit.

Today, 30 tons of iron and brass, already have been salvaged from the French vessels.

Most of this metal consists of cannon balls, anchors and guns. They are too rusted to be worth much as museum pieces, but the salvagers hope they'll prove profitable as scrap metal.

If the tides have not hopelessly covered too many of the 13 French warships that were sunk, the salvagers should do well. For the French ships were big and heavily armed. The flagship, Orient, carried no less than 120 guns on three decks and was twice as powerful as Nelson's largest ship.

The British were outnumbered as

well as outsized. Seventeen French ships were anchored in a row in Abukir bay the night of Aug. 1, 1778, when Nelson arrived with 14 smaller vessels.

On land, a French army already had captured Cairo and the rest of Egypt in just three weeks. Unless Nelson could destroy the French fleet and thereby cut the French army's supply line, Napoleon might well conquer three continents.

The French had anchored in a line so closely paralleling the shore they believed no enemy would dare sail between their vessels and the beach. Nelson, who'd already lost an arm and an eye in battle, studied the French formation, then issued orders.

The British ships split into two lines. One sailed along the seaward side of the French fleet. The other did what the French thought could not be done.

It slipped between the French warships and the land, and began bombarding Napoleon's vessels. So sure were the French that no enemy could navigate the shallow waters toward shore that they weren't even prepared to fire in that direction. Suddenly, however, they were being shelled from British ships on both sides of them.

Three of Nelson's ships attacked

the huge Orient, and by 10 p.m. it caught fire and exploded. One by one, the other French ships either surrendered or were sunk.

Nelson, who said the battle was his 124th, was struck on the forehead by a splinter. It temporarily blinded his one remaining eye. However, none of the British ships were lost in the fight and for the victory Nelson was named Baron Nelson of the Nile.

Britain granted him a pension of 2,000 pounds a year, and the East India company gave him 10,000 more for saving India from the French legions.

Wood and iron taken from the mainmast of the Orient were made into a coffin which was given Nelson with the wish that it would be many years before he would use it.

It was 7 years later, in 1805, that Nelson died defeating another fleet of Napoleon's at Trafalgar. He was buried in the coffin at St. Paul's cathedral in London.

One thing more the world got from the Battle of Abukir bay—the famous poem beginning "The boy stood on the burning deck". The boy was the son of the Orient's commander and the poem describes his last moments aboard the sinking ship. With it sank Napoleon's dream of global empire.

On The Side : - By - E. V. Durling

That a nurse is in a preferred position to acquire a matrimonial mate cannot be questioned. Take a look at the record. However, the patients nurses marry are usually middle-aged men, or older, and most always have been married before. When it comes to acquiring comparatively young and healthy bachelors as husbands, the nurses don't seem to do so well. When it comes to acquiring grade A, young, healthy and high-salaried husbands, the secretaries are tops, with airline hostesses second.

And He Should Know

Why do some sportscribes continue to insist Gene Tunney was a clever boxer, but not a hard hitter. Gene packed a terrific punch. In fact, Jack Dempsey said the hardest blow he ever stopped was one Tunney landed on him in the seventh round of that fight in Chicago. Said Dempsey of this blow: "It was not a question in my mind of being knocked out. I thought I was going to die."

Neurotic Cows

It is said the reason some cows don't produce as much milk as they should is because they are neurotic. They suffer from an "anxiety neurosis". So now many non-productive cows are being treated for that ailment. However, whether a nervous cow is treated by a veterinarian or a psychiatrist and what the treatment consists of, I have been unable to learn.

The Bachelor's Paradise

Am still being informed as to what fun bachelors have in the city of Stockholm, Sweden. There are 60,000 surplus women in Stockholm and many are beautiful blonde widows and divorcees who are in the interesting early thirties. These Swedish widows, I am told, are very merry and the divorcees unusually gay. The competition for male companionship is so keen these Swedish beauties take the initiative in flirtations. They are also not above offering to assume the expenses for an evening of night clubbing. It is a little chilly in Stockholm right now, but you know what the man said: "If winter comes can spring be far behind?" So if you are a bored bachelor keep Stockholm in mind.

Improving His Average

One of the most popular jests of the past was at the expense of the weathermen. Such gags now fall flat because the weather prophets are 88 per cent. right. Ah, to have a horse handicapper with a prediction percentage like that.

Good Financial Return

In a recent British football pool a man won the equivalent of \$250,000 for twelve cents. And no tax to pay on the winnings. Some long shot, what? However, that is not the longest shot possible in the British football pools. It is possible to win two million, eight hundred thousand dollars for twelve cents. This on the fixed odds offered by William Hill, celebrated British bookmaker. No wonder practically everybody in the British Isles takes a regular crack at guessing football scores.

Pedestrians Unite!

A pedestrians' association. That's what they have in England. Object of this organization is protection against wild driving motorists. According to the members of this group after an autoist has had two cocktails he becomes a drunk driver. Even two drinks, they say, will give a man a sense of confidence, inspiring him to take chances he would not risk if he hadn't consumed them.

Known by the Eggs You Order

Recently I stated here that a returned traveller had told me that at a roadside restaurant he had seen a sign reading, "Positively No Soft-Boiled Eggs Served Here". However, my informant did not stop to inquire why the restaurant man so strongly objected to soft-boiled eggs. Now another restaurant man offers an explanation. Says he: "Men who ask for soft-boiled eggs are usually cranky types. They want to give complicated instructions as to the preparation of everything served them. If the eggs are 15 seconds away from the time they mentioned, they will not eat them."

Immigrants Bring Business To Alberta

Cheap Fuel of Medicine Hat
Lure Young Men West

MEDICINE HAT, Alta.—Medicine Hat has added paper weights, figurines and flower vases to its \$35,000,000 a year production of such things as bottles, pottery, sewer pipes and agricultural produce.

And I can thank a group of Czechoslovakian immigrants. In a hangar at the airport, under guidance of John Furch, who has been in the glass business for 25 years, these men are turning out paper weights, intricately spun little figurines and even have the equipment to make glass buttons.

The business was first located in Stratford, Ont., but it was moved to Medicine Hat because of the cheap natural gas available here. Mr. Furch said he can run the plant here for a month at the same cost of a day's operations in Stratford.

An engineer, he designed three furnaces and he also makes his own glass. Each evening after the day's work is done he mixes the silica sand and chemicals and leaves it ready to melt overnight to be ready for the next day's operations.

Mr. Furch makes 300 pounds of glass each night and is hopeful of soon having a furnace that will handle a couple of tons.

The operations are intriguing. A man puts a rod in a furnace and by twirling it builds on the end red hot glass about the size of a light bulb. When it is to the size wanted, it is placed in a cast iron vise which gives it the design of ridges.

To make the opening at the top, tweezers about the size of pliers are inserted and the bowl spun on the rod. The molten glass is handled much as a youngster handles bubble gum.

The article then goes through an oven, the colored glassware moving along a conveyor belt as tongues of flame lick at it. The oven starts at 1,200 degrees and cools 100 degrees every five feet. The glassware moves four inches every minute and when it comes out at the far end it is at room temperature.

Mr. Furch left Czechoslovakia in 1938 when Hitler entered his country. He went to Yorkshire, England, to work in glass factories, and later came to Canada.

The intricate figures of deer, swans and other animals and birds are made by hand. In Stratford the factory concentrated on buttons but it has branched out since moving to Medicine Hat.

GOOD RECORD

While one of three marriages reportedly ends in divorce, it has been estimated that only one of fifty-seven church-going couples winds up in front of the judge pleading for a divorce.

—Central Press Canadian.

BEAUTY TREATMENT — Winter has come to Korea with below-zero temperatures on some parts of the fighting front. This U.N. soldier is coping with it here by using his helmet as a container for snow with which to wash his face. His wash-room is a hill on the front line.

The European team gained 800 points on this deal in their 1950 World Championship match against U.S.A. East opened One Club at both tables; the American South passed, but the Swedish South considered a One Heart overall justified on his two-suited hand.

In the first case the American North's jump to Two Spades over West's One Diamond, although strengthening, was an inadequate effort. South bid Three Hearts, raised to Four Hearts by North, and was eventually pushed up to Five in the wrong trump suit. This contract was three down.

In Room 2 North's hand was improved by his partner's Heart call, and he settled the trump suit with a jump to Four Spades. The Americans in the end had to sacrifice in Six Diamonds doubled.

SIZES VARY

All manufacturers do not make their shoes standard as to width and length. Some firms produce a shoe that is either smaller or larger than the same size made by others. When purchasing shoes, it is advisable to have each foot measured and the correct size computed by the salesman.

Quintuplets Reign Over U.S. Ice Carnival

After heading a monster parade witnessed by 200,000 spectators, the Dionne quintuplets joined in the fun of the ice carnival at St. Paul, Minn., recently. They were one of the principal attractions of the show and were given a "golden chariot" to head the opening parade.—Central Press Canadian.

OLD-AGE PENSIONS TO COST CANADA PLENTY ANNUALLY — First couple in Canada to receive \$40 old age security cheques, Mr. and Mrs. John H. Carter of Toronto seen here with great-granddaughter Shirley Anne Bone, can recall vividly the days when reformers fighting for old age pensions were considered wild-eyed and impractical dreamers. Today after years of study and preparation, 674,000 people all over the Dominion will receive cheques valued at \$29,960,000 following passing of bill by the parliament at its last session, which entitles every Canadian citizen 70 or over to monthly payments of \$40 regardless of income or any other circumstances. Canada is the only country in the world, having no direct contribution to the pension, to pay so large a sum as \$40. The payments will cost the taxpayers a total of roughly \$336,000,000 the first year, more citizens going on the roll from month to month as they reach the required age. This, with family allowance payments of approximately \$322,000,000 annually, means Canada will be making welfare payments to these two sources alone of about \$658,000,000 or the equivalent of \$47 a year for every person in Canada.—Central Press Canadian.

PHOTOGRAPHED IN THE ACT—Just released by the Federal Bureau of Investigation, this is one of a series from a motion picture taken by agents hidden on a New York pier show actual thefts under way on the waterfront. The films are now being studied by members of the New York State crime commission that is probing the \$60,000,000 in thefts annually plaguing N.Y. shippers. All the men shown were convicted and have served their sentences.—Central Press Canadian.

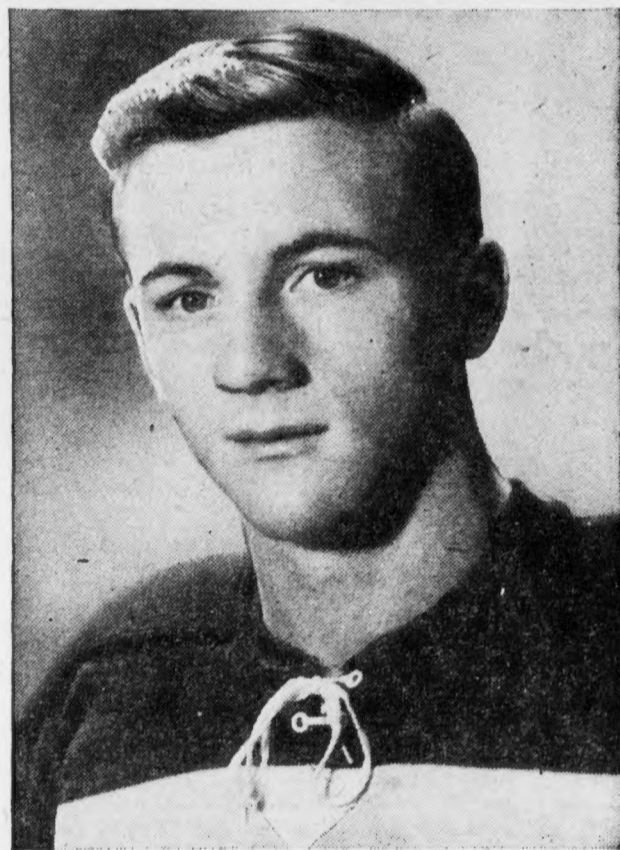

WHAT HAPPENS IF HE'S HUNGRY? — Confident that Leo won't mistake her arm for his dinner, Lola, a circus animal trainer, demonstrates her act in Rome, Italy. She puts her arm into the lion's mouth, leads him around the ring. And, as you see, so far she still has her arm.—Central Press Canadian.

Twice as many women as men live to be more than 100 years old.

HEART'S DESIRE—In a St. Valentine's Day mood, Adele Jergens of the Columbia Pictures roster of stars, poses for the still photographer between movies. A beautiful blue-eyed blonde our Valentine for 1952 hails from Brooklyn and it is an undisputed fact that their loss had been our gain.

DICKIE MOORE, one of the Montreal Canadiens rookies, continues to gather points in the current N.H.L. race. Dickie came to the Habs from the Montreal Royals of the Quebec Senior Hockey League, a farm club of the Canadiens.

CHILDREN TRAPPED IN UPSTAIRS ROOM—This smoke-blackened farm home at Fruitland, Ont., yielded three children's bodies. Donald Sykes, 16; Arlene, 15, and Leonard, 11, were all trapped upstairs when the fire started. Father Russell Sykes, trying to rescue them, was forced by flames to jump from the second-storey window. One child was saved.

Manitoba Scientists Find Solution To Problem Of New Wheat Rust 15B

WINNIPEG.—Plant scientists for years have been searching for a solution to race 15B, a new and dreaded wheat rust threatening prairie crops. Manitoba experimenters say they have found the answer—in their own backyard.

Experiments are conducted under the direction of Dr. R. F. Peterson in charge of the laboratory of cereal breeding at nearby Fort Garry. It may take two years to develop wheat strains to combat the new red scourge.

If weather conditions favor rust development during the next two years the west may again see rusted wheat crops comparable or worse than those of 1935. Rust in 1935 is estimated to have cost eastern prairie farmers \$7,000,000 bushels of wheat, worth at today's prices nearly \$175,000,000.

Manitoba researchers in developing a wheat strain to combat the new rust used McMurachy wheat first discovered in a field at Pipestone, Minn., about 50 miles southwest of Brandon. After a series of crossing McMurachy with other types—Exchange, Thatcher and Redman—it was tested for milling qualities and its resistance to rust.

The result was not a good milling grade but it was able to resist race 15B. By crossing the new wheat with good milling brands, scientists have bred new strains which pass all tests.

The new wheats are of the same general type as Redman and Thatcher and the same color. Farmers will notice little difference.

But time remains an important factor. Many months must pass before sufficient seed can be made available to grain growers. Large-scale tests must be made before milling and baking qualities can finally be assured.

A dry and unusually cold winter in southern Texas, where rust spores develop, saved Canadian wheat last year from an infestation which might have been disastrous.

The new wheat rust—race 15B—was first discovered in the early 40s and has been spreading rapidly, a threat to all commercial wheat

grown in North America. Last year it was plentiful in 19 states south of the Canadian border and appeared in Manitoba and Saskatchewan, but not in Alberta.

Race 15B is the strongest rust yet to face plant scientists. Rusts like insects and some diseases quickly develop strength. It is a never-ending fight with nature.

Several times plant scientists have succeeded in developing wheat strains which proved resistant to rust only to have new rusts appear which could break down the resistant strains.

The importance of finding a wheat strong enough to resist race 15B can be seen in Mexico's experience last year. Farmers threshed fields yielding six to 10 bushels an acre of shrivelled kernels weighing 40-50 pounds a bushel. For some reason fields sowed early escaped rust and yielded well.

Canadian wheat is the last on the continent to be planted. It is a ready target for rust spores riding air currents from the south. Spores have been trapped as high as 20,000 feet.

Sask. Publishers To Meet Aug. 7-8

The annual Saskatchewan convention of the Canadian Weekly Newspapers association will be held Aug. 7 and 8 in Hotel Saskatchewan, it was decided at a meeting of the Saskatchewan division in Regina.

Stirling King of the Estevan Mercury, president of the division, and its secretary-manager, Walter Ashfield of the Grenfell Sun, were chosen as delegates to a board of directors' meeting Feb. 26 and 27 in Ottawa.

Considerable discussion centred around qualification for membership, which is expected to be a major convention subject.

World Happenings Briefly Told

A Canadian motion picture, "Milk Made", has won first prize in the fourth international exhibition at Brescia, Italy, the federal department of agriculture's information service reports.

Schoolboys started a "gold rush" on a river near Cardiff, Wales, that was drained recently. Boys have made about £3 a day collecting scrap metal found in the mud.

Residents of Yateley, England, complained that trials of a British jet airliner shattered their nerves. The big machine was said to have caused plaster to fall from walls in low-flying swoops over the village.

P. A. Coughlin, at 74 a veteran auctioneer, of Barrie, Ont., was presented with his 50th auctioneering licence by the Simcoe County Council. An honorary licence, it will be valid for his lifetime.

Canada led in the importation of Shorthorn cattle from Britain in 1951. Of the 445 Scottish Shorthorns exported, 192 went to Canada, 88 to the United States, 70 to Australia and 62 to the Argentine.

Parts of the 12 bells of St. Bride's Church in London, built by Sir Christopher Wren in the 17th century, now have been removed from vaults under the church. The bells were hidden there during the blitz days of the Second World War.

Soldiers use the jeep for just about everything and now Jerry Larson reports it being used in place of a mule. Larson says he saw a man in Memphis, Tenn., using a jeep to pull a plow, his wife driving the jeep while he guided the plow.

Weekly Tip

COFFEE STAINS

Coffee stains are quickly cleaned from the inside of pots and glass coffee makers by thoroughly washing them in a baking soda solution. Use one tablespoon to a cup of water.

The Charley Horse Problem

One of the most common athletic injuries is the charley horse, a bruised and stiff muscle, usually found between the hip and knee.

Many an important playoff game has been missed by hockey stars because of painful charley horses which left them crippled temporarily. As an example consider the case of the Toronto Maple Leaf centre star of a few years ago, Syl Apps. Apps frequently missed important games during the last two seasons of his professional career because of his trouble with charley horses.

The most common cause of the leg muscle bruise is a hard contact with some object such as a skate toe, foot, a goalpost or knee. Since these muscles play an important part in leg movement a charley horse can slow any player down considerably.

There is an answer to the problem, however, and that is proper treatment and the injury will not cause nearly as much trouble as when neglected. First, don't nurse a charley horse. Keep using it as much as possible. The reason is that the more walking you do on a bruised leg muscle the less it will stiffen and the faster the body will be able to get at its job of healing the injury.

But remember. Make sure your injury is nothing more serious than a bruised muscle!

Don't rub it. Heat and exercise are the best treatments.

Then spread analgesic balm over the injured muscle, about one quarter of an inch thick. Cover with medicated cotton batten, gauze bandage and some adhesive tape.

If your leg is bruised severely use a new pack every day until it begins to feel better. Remember a neglected bruise, even a slight one, might cause trouble later. So start treating your charley horses properly as soon as they happen.

Of course the wisest plan is to eliminate them entirely where possible. And one way of avoiding charley horses is to make your muscles and joints flexible and relaxed. Now here are two fundamental exercises which should help you gain added flexibility.

Kneeling Back Bend.

Kneel on the floor with your knees and ankles together, and your toes pointing behind you. Gradually bend back trying to touch your head to the floor, keeping your knees on the floor throughout the exercise (you may have someone hold them down until you get the idea.) You may use your hands at first to lower yourself. When you can touch your head to the floor to get that extra bit of stretching in try to raise your hips after your head has touched. Repeat 10 times. This is a very good drill for stretching the front thigh muscles, an aid in avoiding a charley horse.

The Back Arch.

The back arch is a general flexibility drill performed on the back. Lie on your back and place the palms of your hands on the floor over your head with the fingers pointing towards the feet. Draw your feet towards your hips until they are directly under your knees. Now make an arch, getting your stomach as high in the air as possible. Hold the arch for a few seconds, then relax and repeat the drill 10 times.

Remember the important fact about flexibility drills. The harder they are for you to do properly—the more you need them. But if you practice these two drills and other flexibility drills outlined in previous columns you will be well on the way to eliminating that serious charley horse problem.

A complete list of the new Sports College literature is contained in the latest edition of the quarterly publication Research Guide. Also in this fine sports newspaper are valuable hints on conditioning, training, and play skills. If you wish a copy delivered to your home send \$1.00 for a one year subscription or \$1.75 for two years to Sports College, Box 99, Toronto 1, Ontario.

New South Wales will export no more kangaroos for publicity — because one died in the United States after eating too much fancy food at a round of parties. 2972

Fashions

Three One-Yarders!

by Anne Adams

THREE BLOUSES in one pattern! And each blouse takes only one yard of 39-inch fabric! Here's real economy. Just think—your suit-blouse and two dressy blouses to wear with your new bell-skirts. Think of linen-like rayon for the tailored blouse, spring-like sheers, or crispy faille for the other two. Pattern R4597 comes in Misses' sizes 10, 12, 14, 16, 18.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send thirty-five cents (35c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

MAJOR EARTHQUAKES

OCCUR SOMEWHERE ON EARTH ON AN AVERAGE OF ABOUT ONCE EACH WEEK!

ANSWER: Arkansas.

PRISCILLA'S POP—Strife With Father

MY GOODNESS! THAT MRS. BLATHERLY IS CERTAINLY LONG-WINDED!

IT TOOK HER 20 MINUTES TO TELL ME WHAT A FINE MAN HER HUSBAND IS!

OF COURSE IT IS! WHY, I COULD LIST YOUR GOOD POINTS IN HALF A MINUTE!

BUT, WALDO... I DIDN'T MEAN IT THAT WAY... I ONLY SAID... OH, WHY MUST YOU BE SO SENSITIVE?

—By Al Vermeer

Weather Man Tells What It Is Like At 77 Below Zero

SNAG, Y.T.—What's it like at 77 degrees below zero in this icebox of the north? The skies are clear. Sparkling ice crystals fall continually. You become used to the hissing sound caused by your breath freezing. Small patches of ice fog can be seen hanging over the sleigh dogs lying in the yard.

At 9:30 a.m. Jan. 20 the temperature here dropped to the phenomenal low of 77.6 degrees below zero, within four degrees of the all-time low of 81 degrees below recorded Feb. 3, 1947. (The world record is said to be 93.6 degrees below, recorded in 1885 at the Siberian village of Verchayansk.)

Snag is the last Canadian intermediate emergency airport, radio range station and meteorological observing station on the north west staking route between Edmonton and Fairbanks, Alaska.

It is situated in the broad White River valley about 20 miles east of the Alaska-Yukon border, and 16 miles northeast of the Alaska highway.

Reports of the recent extremely cold weather were compiled and dispatched by the writer, G. C. Heddle, and the staff of radio range operators who also act in the capacity of weather observers. James Granger had the honor of being the radio operator observing when the temperature dipped to the 77.6 mark.

All during the cold weather the skies were clear but patches of fog, and sometimes dense fog, surrounded the station. Smoke from the chimneys and fumes from the diesel power plant caused ice fog to form and

vehicles moving around the station left vapor trails.

At no time during the cold snap was there much wind and most of the time it was dead calm. Smoke rose straight up from all the chimneys.

A heavy snow that fell a few days before the cold spell was a great hindrance to Sergeant Tolmie, commanding the R.C.A.F. detachment and the crew responsible for maintenance, and to Mr. Heddle, who has to travel a seven-mile stretch of road to the range transmitters. On two occasions he had to walk through heavy drifts in 65-below temperatures.

During the cold wave, when the daily minimum temperatures were ranging from 65 below to the extreme of 77.6, Sgt. Tolmie was a busy man trying to keep all the facilities on the station operating normally.

GEMS OF THOUGHT

ART

For art, if it is to be reckoned with as one of the great values of life, must teach man humility, tolerance, wisdom and magnanimity. The value of art is not beauty, but right action.—W. Somerset Maugham.

All great art is the expression of man's delight in God's work, not his own.—Ruskin.

We are all sculptors, working out our ideals, and leaving the impress of mind on the body as well as on history and marble, chiselling to higher excellence, or leaving to rot and ruin the mind's ideals.—Mary Baker Eddy.

There is no more potent antidote to low sensuality than admiration of the beautiful. All the higher arts of design are essentially chaste, without respect to the object. They purify the thoughts as tragedy purifies the passions.—Schlegel.

Above all, there is no art without rational thinking.—Heinrich Mann.

Art is a revelation... a result, not a product... the ego must be subordinated to the living values.

Ralph Adams Cram

Helpful Hints

Vaseline or cold cream rubbed on the eyebrows and the bridge of your nose will keep soapy trickles from running into your eyes when you shampoo your hair.

A liberal pinch of bluing and a couple of tablespoons of kerosene added to a pail of hot soapsuds will make your window panes super-shiny.

Sandpaper and varnish the edges of sticking drawers. The varnish will keep them from swelling and shrinking. It is a good idea to varnish or paint the inside of the drawers also.

Use a whisk broom for cleaning the carpeted stairways. It gets into all the corners of both carpet and woodwork and prevents dust from accumulating.

SMILE OF THE WEEK

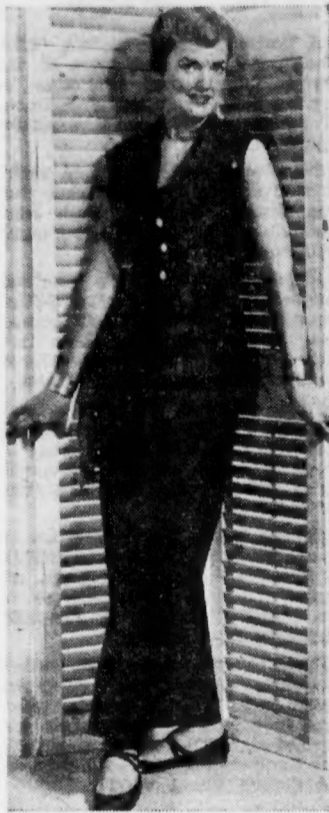

He: "Pardon me, but you look like Helen Green."
She: "So what? I look even worse in pink."

ANSWERS TO QUICK QUIZ

ANSWERS: 5. Oats. 3. Viscose rayon, long-wearing cloth for suits. 1. Sask. 4. Less than 40 per cent. 2. Thirteen.

(Material supplied by the Editors of Quick Canadian Facts, the handbook of facts about Canada.)

CANADIAN FASHIONS

Deep coral corduroy in a vest worn over slacks is part of Fairway's separate group. The shorts and bra top in the same fabric belong to the set.

Canada Is Great Industrial Country

WINNIPEG. — The New York Times says that the rise of the Canadian dollar to full parity with the American dollar was not just another fluctuation on the foreign exchange market but an accomplishment "well merited by the facts. Economically, it represented a well-justified recognition of the enormous productive gains made by our great northern neighbor," the Times says in an editorial. "... from an overwhelmingly agricultural country Canada has been transformed into one of the great industrial countries of the world..."

In 1949 France reported a literacy rate of 93 per cent.

Two Saskatchewan Farmers Tackle Damp Grain Problem

IMPERIAL, Sask.—For the middle of winter the sports field of this central Saskatchewan community is one big hive of activity. Two district farmers have set up a portable grain drying machine on the field. They are trying to do something in a small way about the problem of damp grain from the 1951 harvest.

The provincial agriculture department has estimated there are 40,000,000 bushels of damp wheat in storage on Saskatchewan farms—and it will be in danger of spoilage once warm weather comes.

Big driers at the Lakehead, on the Pacific coast and at inland terminal elevators, working at capacity round the clock, have been unable to keep pace with the flow of damp grain. Recently Jack Vallance of the board of grain commissioners urged farmers to do whatever they can to dry their own grain before spring.

Harold Vance and Norman Hebern, farmers in this district about 100 miles northwest of Regina, purchased their drier in South Dakota for about \$11,000.

The long, silver-painted machine is set up on the sports field amid piles of snow-covered wheat. Trucks and men hurry about it, pouring cold, damp wheat into the hopper and hauling warm, dry grain away from the spout.

They began operation of their machine and with little interruption have been drying wheat at a rate of 130 bushels an hour since. They expect to increase the drying rate as they become more experienced in operation.

The moisture content of the grain is being reduced from 22 per cent. to about 13.5 per cent.

The machine is built on a semi-trailer attached to a heavy truck. Essentially the apparatus is two huge tubes 32 feet long and three feet in diameter. Heat from an oil burner blast flame beneath the front end of the heating tube is drawn to the rear of the machine and back through the tube to the front and is blown out an exhaust port by a large fan.

Grain is fed into this tube from a hopper at the rear and is tumbled along the inclined tube to the front end by means of fans protruding inside. After passing through the heated tube, the grain enters the cooling tube, where a blast of cold air is propelled by a second large fan. The grain pours out of the rear end of the cooling tube and is elevated into a truck.

Other than feeding grain to and taking it away from the machine, it can be operated by one man. The rate at which the grain passes through the machine can be regulated.

ODDITIES In The News

A man and his wife of Buffalo, N.Y., saw their names in a newspaper listing of persons who had income tax refunds coming. So they took a day off from work and went to the Internal Revenue Office to collect. Their refund was one cent.

When Vito Passero of Fort Erie, went to his poultry house, he found an egg that weighed eight ounces, was four inches long and two inches wide and contained three yolks.

A farmer of Devonport, England, got a bonus here when he was dressing one of his turkeys for the table. The turkey had picked up somewhere and swallowed a pre-Victorian gold half-sovereign, worth 10 shillings.

The city of Barcelona's famous Noah's Ark Society, formed of people with surnames of birds and animals will celebrate its 25th anniversary soon by giving a "feast" to animals in the zoo here. The president of the society is Don Guillermo Clervo (William Deer).

In Marblehead, Mass., apparently the men who stole Elmer Davis' car don't smoke. All that was found of the car was the body and two ashtrays. Removed by the thieves were: Engine, wheels, drive shaft, transmission, seats, dashboard, spare tire, battery, wiring, lights and accessories.

Recent drought and bush fires in Queensland, Barcaldine, Australia, have forced foxes to turn vegetarian. Foxes have been seen eating melons on farms.

A Bronx, New York, grand jury making an inspection tour of Rikers Island prison looked with some amazement at an advertising poster on the wall of the prison library. It suggested: "Fly to Bermuda".

72-Year-Old Nurse Rescues Patient

VICTORIA, B.C. — Plucky Miss Jane Megarry, a 72-year-old graduate nurse recently assisted in the rescue of her nonagenarian patient in an apartment house fire. She helped her charge, 94-year-old Miss Alice Turner, from smoke-filled rooms.

Miss Megarry was decorated some years ago by the king for her nursing work among Alberta Indians.

While nurse in charge of the St. Paul's Indian Residential school at Cardston, Alta., from 1924 to 1936, Miss Megarry taught first-aid and home nursing to the Indians.

As a result they were among the first natives to win many honors in St. John Ambulance competitions.

Miss Megarry received recognition for this from the king. She was awarded the medal as a Serving Sister of the Order of the Hospital of St. John of Jerusalem. Presentation was made in Ottawa by the Earl of Bessborough, then Governor-General of Canada.

OUR COMPLETE SHORT STORY—

NOT AGGRESSIVE

By RUTH K. KENT

RAMONA rushed into the trailer and grabbed the smoking frying pan from the tall young man and threw it into the yard. "Goodness, you only drove in fifteen minutes ago and you're about to burn up the trailer camp," she gasped. "What was that? A shoe sole?"

"No ma'am, it's an egg. It's my supper. That is... it was," he looked wistfully at the charred fragment on the ground.

Another helpless customer, Ramona thought. But a good-looking one, at last.

"I'm sorry," he said as the smoke cleared enough for Ramona to see how blue his eyes were. "You see, mother and I are driving across the continent. This afternoon she decided to continue by train so I'm taking my time. She always did the cooking," he explained.

"Why didn't you ask mother or me to help?" Ramona asked as she set out his supper.

He smiled. "I'm not aggressive, I guess."

No, he certainly wasn't, Ramona thought. "Think you can wash the dishes without cutting your finger?" she asked.

"I can manage," he assured her. He reached into his pocket. "How much do you charge?"

"Charge?" she shouted. "Ye gods!" She stumbled from the trailer and ran across the lawn with her mother. A few raindrops were falling and they mingled with her tears.

"What's up?" her mother asked. "He tried to fry an egg," Ramona said. "the stuck-up sissy!"

"He has nice eyes. Good-looking, too," Mrs. Stevens closed the windows. "We're in for a storm."

Ramona shivered. She undressed

and crawled into bed and pulled the covers over her head. Not aggressive, she thought. No, he wasn't even awake. He was stupid. Lightning flared and thunder surrounded the cabin and Ramona's knees shook so that the cot creaked.

Then her mother was shaking her. "Wake up, dear."

"How could anybody sleep?" Ramona peeked from under the covers.

"Get dressed. Someone's out, on the lake in a rowboat. We'll have to take the launch out. Hurry."

"Not in this storm. You-know I'm scared..."

Mrs. Stevens was helping Ramona dress. "I tried to rouse that new man to help me."

"He'd be a big help!" Ramona grumbled as she crawled into the launch.

"The launch pitched crazily and the rain beat against their faces. The lightning sent shivers down Ramona's spine.

"See if you can locate the rowboat the next time it flashes," her mother said.

"I can't Ramona said, I always close my eyes."

"Oh, there it is," Mrs. Stevens cried. She turned the launch and tried to draw alongside the rowboat.

"Why... it's the new man."

"It would be!" Ramona said.

"Here, you steer the boat and I'll reach over and give him a hand. He's broken an oar."

Ramona tried to hold the wheel steady, but a flash of lightning sent her hands to cover her eyes.

"Oh my," her mother complained, "let me have that wheel. Now... reach over and take his hand when I pull over. He'll haul himself in. There... now..."

Ramona shivered as she leaned over as far as she dared. The young man held the broken oar toward her. "Can you grab it?"

Every time Ramona touched it the waves swung the boats apart. With each flash of lightning Ramona jerked back.

"Ramona, please try it again," her mother begged.

"Alright," Ramona said wearily. She'd rescue him. Then he could offer to pay her. That would be all.

The wind swung the boats close and Ramona grabbed for the oar. She leaned way over and hung on.

"Got it," the young man called. He hauled the boats close. But she was leaning too far out of the boat. With a splash she was in the water.

Then a strong arm went around her and powerful muscles swam against the waves. A steady hand pulled her into the launch. She was resting against a soggy shirt front that smelled of tobacco.

"Darling, you're safe," her mother shouted. "I'll get this boat into shore in a jiffy. He saved your life."

Ramona squirmed. "I... we'll pay you," she said.

She tried to pull away but the arm tightened. "You might get cold," he said. "I'd like to keep you warm. But please don't think I'm aggressive."

Ramona smiled. The summer wouldn't be so bad after all.

Vancouver To Seek Television

VANCOUVER. — Request for a television station in Vancouver will be made to the Cabinet in a few weeks by the Canadian Broadcasting Corporation, Chairman A. Davidson Dunton said during a visit here.

Requests for private station licenses will not be granted until the CBC system is completed, he added.

CKNW, at New Westminster, wants to build a private station.

Vancouver will not be linked with Seattle or other U.S. TV outlets.

—Central Press Canadian.

BAD NEWS BOOK FOR TAXPAYERS — How \$85,444,000,000 of U.S. taxpayers' money is to be spent in 1953 is contained in these books held by Sen. Walter F. George, chairman of the U.S. finance committee. It's a record budget for peacetime and will require another \$5,000,000,000 to be raised by taxes. The budget, presented by President Truman, has yet to be passed by Congress.

Market, Prices For Wheat To Be Good

OTTAWA.—A sharp reduction in world supplies of wheat will assure Canadian growers top prices and even a premium on exports for the next several months.

Federal grain experts said Canada may even have to ship some wheat to Argentina, a country normally considered one of the big four exporters. On the basis of present estimates, the Argentine will have no wheat to ship abroad this year.

"The situation is going to be tight for the next several months," a bureau of statistics official said. "It's a good situation for the countries like Canada that have wheat to sell. Importers will have to pay the top international wheat agreement price and a premium for anything they want to buy over I.W.A. quotas."

The official was commenting on a D.B.S. survey of the world wheat situation which said supplies on Jan. 1 in the four major exporting countries were only 1,021,000,000 bushels, 10 per cent. below the figure for Jan. 1, 1951.

Canada is the only country of the four which has more wheat on hand than it had a year ago. The United States and Australia show substantial reductions, and Argentina may have no wheat to export in place of the 98,000,000 bushels on hand at the start of last year.

Under the international wheat agreement, Canada has a guaranteed market for 232,900,000 bushels this year, and up to Jan. 22, more than half of the quota had been taken up by exporters. The 1951 crop was estimated at 598,800,000 bushels, but 28 per cent.—150,000,000 bushels—was still unharvested at the year-end because of snow-covered fields.

At the start of 1952, the U.S. supply was reported at 456,000,000 bushels compared with 639,000,000 at the start of 1951. Australian supplies were 101,000,000 bushels at the start of 1952, compared with 134,000,000 bushels at the start of 1951, the bureau said. The Argentine supply was listed with an official "nil" for the first of 1952, compared with 98,000,000 bushels a year earlier.

THRILLS of the ROARIN' GAME

Devotees of the ancient Scottish art of curling come into their own—motion picture-wise—with the release of Associated Screen Studios' February Canadian Cameo short subject, The Roaring Game.

This is the first time that a motion picture has been produced on curling, and it appropriately features Ken Watson, of Winnipeg, or as he is known to curlers on this continent, "Mr. Curler". One of the world's outstanding curlers, Watson has thrice skipped rinks to Canadian Curling Championships.

This old-world game has been adapted to the pace of the new, and today it is a fast-moving, exciting sport that has swept across the northern half of the North American continent. In western Canada, particularly, the craze has been greatest. Out on the prairies, they start curling at a very tender age, and Regina boasts of the largest juvenile curling group in the country, known as the "Jam Tin League". This odd title derives from the fact that the young players make their own "stones" out of concrete-filled 5-lb. jam tins. The picture mentions that

the curling fraternity now numbers in the hundreds of thousands, which all adds up to the startling fact that there are more curlers than golfers in Canada!

A flashback in The Roaring Game shows quarrying operations in the Isle of Ailsa Craig, the only spot in the world where suitable granite for curling stones is found. The camera reveals that the pieces of blasted rock are chosen for their fine grain and uniform texture, their toughness and their evenness of colour, while techniques handed down from generation to generation produce each year over two thousand pairs of stones.

This motion picture had its world premiere in Winnipeg late in January during the playing of the Annual Manitoba Bonspiel, and hundreds of Bonspiel participants attended its showing.

Direction of The Roaring Game was handled by Gordon Sparling, while the script was written by Associated Screen Studio film director, John McDougall, a curler of no mean repute himself. The musical score which has a delightful Scottish motif was written by Lucio Agostini, celebrated Canadian musician.

MR. CURLING IN ACTION—Ken Watson, of Winnipeg, gets set to send a stone down the ice. Undoubtedly one of curling's all-time greats, Watson shows flawless style in this delivery. The scene is taken from a curling short, The Roaring Game, filmed by Associated Screen Studios. The picture deals exclusively with curling in western Canada, and shows how an old-world game has been modernized to the fast-moving, exciting sport that it is in the west.

How COLDS affect Your KIDNEYS

The kidneys are very delicate organs, easily affected—especially by a cold. Their duty is to filter impurities and excess acids from the blood. When you have a cold extra work is thrown upon your kidneys. Dodd's Kidney Pills help your kidneys clear your system of excess acids and poisons caused by colds, and give you a chance to shake infection sooner—feel better faster. If you have a cold get and use Dodd's Kidney Pills. 139

How To Hold FALSE TEETH More Firmly in Place

Do your false teeth annoy and embarrass you by slipping, dropping or wobbling when you eat, laugh or talk? Just sprinkle a little FASTEREETH on your plates. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gummy, gooey, pasty taste or feeling. Does not sour. Checks "plate odor" (denture breath). Get FASTEREETH today at any drug store.

Miss A. Dahlke and Mr. Edwin Dahlke of Calgary were weekend visitors in the Level Land district.

Dinner guests at the home of Mr. and Mrs. Sam Leiske were Pastors A. Taylor, L.H. Davis and A. Blair.

CHEVROLET FOR 1952 features greater riding comfort through redesigned shock absorbers; improved performance through refinements in carburetion and through new type engine mountings; and a wide variety of new exterior colors combined with harmonizing interior trim and fabrics of deluxe models. A new radiator grille, fresh ornamentation and bright metal work contribute to a lower, longer appearance. Eleven models are available including the popular Bel Air, the Convertible and the Station Wagon. Shown here is the 1952 Chevrolet Styleline Deluxe four-door sedan.

GUARDIANS OF PEACE

THE LEADING INFANTRYMEN

Canadian soldiers are playing a world-wide role to discourage aggression . . . to help guard peace. At home and overseas, our soldiers stand as — Guardians of Peace.

The Canadian Infantry Soldier is the toughest, the best equipped fighting soldier in the world today.

Recently a new specialty with extra pay and prestige was created for the Infantry Soldier. This is the Leading Infantryman.

He is the trained Infantry Soldier. He has learnt to handle expertly the many weapons of modern infantry. He has been trained to take care of himself anywhere, any time, in any kind of situation. The Leading Infantryman is the most thoroughly trained fighting soldier in the Army.

Play your part in Canada's most important business today, defence. You are eligible if you are: 17 to 40 years of age, (tradesmen to 45), physically fit and ready to serve anywhere.
